# Billing Groups

Billing groups allow Enterprise admins to understand and manage spend across groups of users. This functionality is useful for reporting, internal chargebacks, and budgeting.

## Billing group architecture

Admins can assign each member to a billing group. Members can only be in one billing group at a time. Members not actively assigned in any other billing group are placed in a reserved `Unassigned` group.

All usage is attributed to the user's group at the time it occurs. Historical data does not change when users move between groups, though it can be reassigned only when a group is deleted. In that case, all of its usage is moved to the `Unassigned` group.

## View billing groups

Enterprise admins can view billing groups in the web dashboard under the `Members & Groups` tab. This table shows each group, how it is configured, the number of members in it, and spend for the period.

The screenshot shows the 'Members & Groups' dashboard. On the left is a sidebar with navigation links: Overview, Settings, Members & Groups (selected), Audit Log, Integrations, Cloud Agents, Bugbot, Shared Knowledge, Shared Chats, Analytics, Usage, Spending, Billing & Invoices, Docs, and Contact Us. The main content area is titled 'Members & Groups' and has tabs for 'Members', 'Directory Groups', and 'Billing Groups' (selected). At the top right of the main area are buttons for '+ Create Group', 'Upload CSV', and 'Export CSV'. Below these buttons, it says 'Showing data for Dec 1, 2025 - Jan 1, 2026'. The table below has columns: GROUP NAME, TYPE, MEMBERS, ON-DEMAND SPEND, and ACTIONS. The table lists several groups: Unassigned (Reserved, 211 members, \$0.00), Engineers (SCIM, 75 members, \$0.00), Marketing (SCIM, 32 members, \$0.00), Experimental Projects (SCIM, 9 members, \$0.00), Product (Manual, 5 members, \$0.00), Sales Engineering (Manual, 2 members, \$0.00), and Design (Manual, 1 member, \$0.00). Each group has an edit icon in the ACTIONS column.

| GROUP NAME            | TYPE     | MEMBERS | ON-DEMAND SPEND | ACTIONS |
|-----------------------|----------|---------|-----------------|---------|
| Unassigned            | Reserved | 211     | \$0.00          |         |
| Engineers             | SCIM     | 75      | \$0.00          |         |
| Marketing             | SCIM     | 32      | \$0.00          |         |
| Experimental Projects | SCIM     | 9       | \$0.00          |         |
| Product               | Manual   | 5       | \$0.00          |         |
| Sales Engineering     | Manual   | 2       | \$0.00          |         |
| Design                | Manual   | 1       | \$0.00          |         |

## Create and add members to a billing group

Admins can create billing groups by clicking `Create Group`. After naming the group, there are four ways to assign members to that group:

1. **SCIM:** Sync the billing group with an existing `SCIM` group.
2. **API:** Create groups and add members programmatically via the `Admin API`.
3. **CSV:** Upload a CSV with group names and email addresses of members.
4. **Manual:** Click `Add Members` and manually select `Unassigned` members to be added.

Billing groups synced with SCIM cannot be edited via CSV, API, or manual UI changes. All member assignment for SCIM-synced groups must be handled via SCIM.

## Move members between billing groups

Admins can move members from manual billing groups by clicking on the billing group and selecting `Move`.

- **SCIM:** When members are moved between SCIM groups in your identity provider, the billing group follows those changes automatically.
- **API:** Use the [add members](#) and [remove members](#) endpoints to move members programmatically.

## Rename a billing group

Billing groups can be renamed by clicking the gear button on the main menu, or by clicking [Rename](#) on the page for that specific billing group.

- **API:** Use the [update group](#) endpoint to rename groups programmatically.

## Delete a billing group

Billing groups can be deleted by clicking the gear button on the main menu, or by clicking [Delete](#) on the page for that specific billing group.

- **API:** Use the [delete group](#) endpoint to delete groups programmatically.

Deleting a billing group is a destructive operation; data cannot be recovered. All historic usage for deleted groups is assigned retroactively to the [Unassigned](#) group.

Billing groups are available on the Enterprise plan
