

Teams & Enterprise

Team Pricing

There are two teams plans: Teams (\$40/user/mo) and Enterprise (Custom).

Team plans provide additional features like:

- Privacy Mode enforcement
- Admin Dashboard with usage stats (also accessible via [Admin API](#))
- Centralized team billing
- SAML/OIDC SSO

We recommend Teams for any customer that is happy self-serving. We recommend [Enterprise](#) for customers that need priority support, pooled usage, invoicing, SCIM, or advanced security controls. [Contact sales](#) to get started.

How pricing works

Teams pricing is usage-based. Each seat includes monthly usage, and you can continue using Cursor beyond that with on-demand usage.

Included usage

Each team seat (\$40/mo) comes with **\$20/mo of included usage**. This usage:

- Is allocated per user (each user gets their own \$20)
- Does not transfer between team members
- Resets at the start of each billing cycle
- Covers all agent requests at public list API prices + Cursor Token Rate

Our [Enterprise plan](#) offers pooled usage shared between all users in a team. [Get in touch](#) with our team to learn more.

On-demand usage

On-demand usage allows you to continue using models after your included amount is consumed, billed in arrears.

When exceeding the \$20 of included usage, team members automatically continue with **on-demand usage**:

- Billed monthly at the same rates (API prices + Cursor Token Rate)
- No interruption in service or quality
- Tracked per user in your admin dashboard (see [spending data API](#))
- Can be controlled with spending limits

On-demand usage is enabled by default for the Teams plan.

Cursor Token Rate

All non-Auto agent requests include a **Cursor Token Rate of \$0.25 per million tokens**. This covers:

- Semantic search
- Custom model execution (Tab, Apply, etc.)
- Infrastructure and processing costs

The Cursor Token Rate applies to all tokens: input, output, and cached tokens. This applies to [BYOK](#) as well.

Active seats

Cursor bills per active user, not pre-allocated seats. Add or remove users anytime and billing will adjust immediately.

Refunds appear as account credit on your next invoice. Your renewal date stays the same.

Spending controls

Teams can configure monthly team-wide spending limits. You can manage these limits through the dashboard. Per-member spend limits are available on [Enterprise plans](#).

Contact enterprise@cursor.com for volume discounts on larger teams.

Model Pricing

All prices are per million tokens. Teams are charged at public list API prices + [Cursor Token Rate](#).

Name ^	Input	Cache Write	Cache Read	Output
