Cursor for Teams

Cursor works for individuals and teams. The Teams plan provides tools for organizations: SSO, team management, access controls, and usage analytics.

Creating a Team

Create a team by following these steps:

1 Set up Teams plan

To create a Team, follow these steps:

1. For new users: Visit cursor.com/team/new-team to create a new account and team
2. For existing users: Go to your [dashboard](#) and click "Upgrade to Teams"

2 Enter Team details

Select a Team name and billing cycle

3 Invite members

Invite team members. User counts are prorated - you only pay for the time users are members.

You can opt in to domain matching so teammates with verified, matching email domains can join your team without an invite. Configure it in [team settings](#).

4 Enable SSO (optional)

Enable [SSO](#) for security and automated onboarding.

FAQ

My team uses ZScaler / a proxy / a VPN, will Cursor work? ▾
