

Models

Composer 2

Model ID composer-2	Context window 200k	Max context -	Provider Cursor
Capabilities ∞ 🔗 📄	Speed Fast	Cost Low	Intelligence Frontier

Composer 2 is Cursor's own agentic model. It reaches frontier-level coding performance with strong results on [CursorBench](#) while using tokens efficiently.

Strengths

- Strong on long-horizon tasks via self-summarization during training.
- Default fast variant for interactive sessions; standard tier further optimized for cost per token.
- Tuned for tool use, file edits, and terminal operations inside Cursor.

Tools

Composer 2 has access to all agent tools when used with Cursor including:

 Semantic search	▼
 Search files and folders	▼
 Web	▼
 Read files	▼
 Edit files	▼
 Run shell commands	▼
 Browser	▼
 Image generation	▼
 Ask questions	▼
 Fetch rules	▼

Pricing

A **faster variant** with the same intelligence is also available at \$1.50/M input and \$7.50/M output tokens. Fast is the default in the

product and is priced lower than other fast models at similar speeds.

On individual plans, Composer draws from a **standalone Composer usage pool** with generous included usage. On team and enterprise plans, the API price below is charged directly. All prices are per million tokens.

Name ^	Input	Cache Write	Cache Read	Output
 Composer 2	\$0.5	-	\$0.2	\$2.5
 Composer 2 (Fast)	\$1.5	-	\$0.35	\$7.5
