GPT-5.3 Codex

Model ID gpt-5.3-codex	Context window 272k	Max context -	Provider OpenAI
Capabilities ∞ 🧠 📄	Speed Medium	Cost Medium	Intelligence Frontier

GPT-5.3 Codex is OpenAI's flagship coding model. It leads Terminal-Bench by a wide margin and performs on par with Opus 4.6 on our internal benchmarks, at roughly one-third the price. Much faster than previous GPT generations. A strong default for most coding tasks.

Strengths

- Leads Terminal-Bench by a wide margin. Competitive with Opus 4.6 on our internal benchmarks.
- About one-third the price of Opus with comparable quality on most tasks. Good for daily coding, long debugging sessions, and cost-conscious teams.
- Grinds through complex, multi-step problems and deep debugging sessions.

Limitations

- Code style is less polished than Opus on architecture-heavy tasks.
- Terminal-Bench skews toward general reasoning; real-world coding gains may differ.

Tools

GPT-5.3 Codex has access to all agent tools when used with Cursor including:

📁 Semantic search	▼
🔍 Search files and folders	▼
🌐 Web	▼
📄 Read files	▼
✎ Edit files	▼
>_ Run shell commands	▼
🌐 Browser	▼
🖼 Image generation	▼

Pricing

Cursor [plans](#) include two usage pools. GPT-5.3 Codex draws from the **API** pool, which charges at the rates below. Individual plans include at least \$20 of API usage each month (more on higher tiers). All prices are per million tokens.

Name ^	Input	Cache Write	Cache Read	Output
 GPT-5.3 Codex 	\$1.75	-	\$0.175	\$14

A high reasoning effort variant (`gpt-5.3-codex-high`) is available for tasks that need deeper analysis.
